Saburo Higuchi  
hig@math.ryukoku.ac.jp

August 1, 2007

- [1] Go Ono, Saburo Higuchi, and Tadashi Sugawara et.al.  
One-dimensional double chain composed of carbamoylmethylthio-substituted TTF-based donor in iron radical salt.  
*Journal of Material Chemistry*, 10:2277–2282, 2000.
- [2] Saburo Higuchi.  
Loop model with generalized fugacity in three dimensions.  
*Journal of Physics A*, 33(8):1661–1673, March 3 2000.  
cond-mat/9907335.
- [3] Saburo Higuchi.  
Compact polymers on decorated square lattices.  
*Journal of Physics A*, 32(20):3697–3709, May 21 1999.  
cond-mat/9811426, (link to IOP server).
- [4] Saburo Higuchi.  
Hamiltonian cycles on random lattices of arbitrary genus.  
*Nuclear Physics*, B540(3):731–741, February 15 1999.  
cond-mat/9806349,(doi).
- [5] Saburo Higuchi.  
Counting Hamiltonian cycles on planar random lattices.  
*Modern Physics Letters*, A13(9):727–734, March 21 1998.  
cond-mat/9801307,(link to WSP server).
- [6] Saburo Higuchi.  
Field theoretic approach to the counting problem of Hamiltonian cycles of graphs.

- Physical Review*, E58(1):128–132, July 1998.  
 cond-mat/9711152, (link to AIP server).
- [7] Saburo Higuchi, Chigak Itoi, Shinsuke Nishigaki, and Norisuke Sakai.  
 Renormalization group approach to multiple-arc random matrix models.  
*Physics Letters*, B398:123–129, April 10 1997.  
 hep-th/9612237.
- [8] Saburo Higuchi, Chigak Itoi, Shinsuke Nishigaki, and Norisuke Sakai.  
 Large  $N$  renormalization group for random matrix models.  
 In Natig M. Atakishiyev, Thomas H. Seligman, and Kurt Bernardo Wolf, editors, *Proceedings of the IVth Wigner symposium*, pages 334–337,  
 Guadalajara, México, 7–11 August 1995. Universidad Nacional Autónoma  
 de México, Cuernavaca, World Scientific (1996).
- [9] Masako Asano and Saburo Higuchi.  
 A connection between lattice and surgery constructions of three-  
 dimensional topological field theories.  
*Modern Physics Letters*, A10(37):2831–2842, December 7 1995.  
 hep-th/9507146.
- [10] Saburo Higuchi and Ivan K. Kostov.  
 Feynman rules for string field theories with discrete target space.  
*Physics Letters*, B357:62–70, August 31 1995.  
 hep-th/9506022.
- [11] Saburo Higuchi, Chigak Itoi, Shinsuke Nishigaki, and Norisuke Sakai.  
 Renormalization group flow in one- and two-matrix models.  
*Nuclear Physics*, B434:283–318, January 23 1995.  
 hep-th/9409009, Erratum-ibid. **B441**(1995)405. (link to Elsevier server).
- [12] Masako Asano and Saburo Higuchi.  
 On three-dimensional topological field theories constructed from  $D^\omega(G)$  for  
 finite groups.  
*Modern Physics Letters*, A9(25):2359–2369, August 20 1994.  
 hep-th/9305099.
- [13] Saburo Higuchi, Chigak Itoi, Shinsuke Nishigaki, and Norisuke Sakai.  
 Nonlinear renormalization group equation for matrix models.  
*Physics Letters*, B318:63–72, November 25 1993.  
 hep-th/9307116.

- [14] Saburo Higuchi, Chigak Itoi, Shinsuke Nishigaki, and Norisuke Sakai.  
Renormalization group approach to discretized gravity.  
In Y.M. Cho, editor, *Current Topics in Theoretical Physics, Proceedings of the 1st Pacific Winter School for Theoretical Physics*, pages 96–105, Sorak Mountain resort, Korea, 22–26 February 1993. World Scientific (1994).  
hep-th/9307065.
- [15] Saburo Higuchi, Chigak Itoi, and Norisuke Sakai.  
Renormalization group approach to matrix models and vector models.  
*Progress of Theoretical Physics Supplement*, 114:53–71, July 1993.  
hep-th/9307154.
- [16] Saburo Higuchi, Chigak Itoi, and Norisuke Sakai.  
Exact beta functions in the vector model and the renormalization group approach.  
*Physics Letters*, B312:88–96, August 5 1993.  
hep-th/9303090.
- [17] Yoshihisa Fujiwara, Saburo Higuchi, Akio Hosoya, Takashi Mishima, and Masaru Siino.  
Topology change by quantum tunneling in (2+1)-dimensional Einstein gravity.  
*Progress of Theoretical Physics*, 87(2):253–268, February 1992.
- [18] Kaoru Amano and Saburo Higuchi.  
ISO(2,1) gauge fields and 2+1 dimensional space-time.  
*Progress of Theoretical Physics Supplement*, 110:151–158, February 1992.
- [19] Kaoru Amano and Saburo Higuchi.  
Topology change in ISO(2,1) Chern-Simons gravity.  
*Nuclear Physics*, B377:218–235, June 22 1992.  
hep-th/9201075.
- [20] Yoshihisa Fujiwara, Saburo Higuchi, Akio Hosoya, Takashi Mishima, and Masaru Siino.  
Point particles as defects in (2+1)-dimensional quantum gravity.  
*Classical and Quantum Gravity*, 9(4):867–872, April 1992.
- [21] Yoshihisa Fujiwara, Saburo Higuchi, Akio Hosoya, Takashi Mishima, and Masaru Siino.  
Topology changes in (2+1)-dimensional quantum gravity.  
*Physical Review*, D44(6):1763–1768, September 15 1991.  
(link to APS server).

[22] Yoshihisa Fujiwara, Saburo Higuchi, Akio Hosoya, Takashi Mishima, and Masaru Siino.

Nucleation of a universe in (2+1)-dimensional gravity with a negative cosmological constant.

*Physical Review*, D44(6):1756–1762, September 15 1991.

(link to APS server).
